NAME OF PERSON(S) CONTACTED OR IN CONTACT WITH YOU	ORGANIZATION (Office, dept., bureau, etc.)	TELEPHONE NO.		
Hanford Employee	Kaiser Transportation	(509)373-1635		
SUBJECT 3000 Area Disposal Activities				

SUMMARY The employee said that on the east side of Building 1227 and 1212, batteries were discharged for 15-20 years and this activity ended about 10 years ago. The batteries were then stored on pallets until a recycler picked them up. Between the 1227 and 1212 and 1226 building, oil was spread using a spreading bar. This was done by driving around and around with a 55 gal drum and spreader bar until oil was all discharged. This was the method of disposal for waste oil until about 10 years ago. This coincides with the installation of a waste oil tank at Bldg (1226 Tank #12). Other sites that he reported was a paint disposal pit between 200E Paint Shop and B Plant covered over, landfill past Y barricade long way around to 100 N in a gravel pit covered up. Hot house works at White Bluffs (refer to map/drawing called Miner Construction, JA Jones White Bluffs Shops) Radioactive disposal at silo.

ACTION REQUIRED Need to have employee show us the site.
